### REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:
2. Applicants' communication paper dated 2/23/04 is acknowledged. Together with their earlier communication(s), applicants have cancelled claims 1-48, 54, amended claim 53, and thus limited the claimed invention to composition(s) and method of treating malaria. Therefore, the claims under consideration are the claims 49-53, 55-57 that are renumbered as claims 1-8.
3. The closest prior art of record reference Cusic (U.S.P. 2687414) teaches method for producing aromatic amino alkyl; amines, and their generic utility as histamine antagonists and antispasmodic agents (see column 3 lines 68-74, and Example 24 in column 8 lines 54-65 for 10-N-pyrrolidinopropyl phenothiazine). The ref. differs from the instant invention by not having a butyl bridge, and the different utility.
4. The other art reference Yoshitani (Japan Circulation J., 27/6,487-98(1963), also cited as Chemical Abstract DN 60:12388) also teaches compound having CAS RN # 3733-37-7(= Phenothiazine, 10-[3-(1-pyrrolidinyl) propyl]- and its utility for antiarrhythmic action for heart.
5. The references either alone or in combination do not suggest or indicate to arriving at the instant invention.
6. Therefore, the instant invention is deemed to be novel and patentably distinct.
7. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
